# Making of Hand Sanitizer and Distribution as part of Community Social Responsibility:

Distribution of Hand Sanitizer

Preparation of Hand Sanitizer in the Chemistry Lab.

## B. Preparation and Distribution of Bio-Fertilizer in the nearby villages.

# National Science Day celebration with the Local farmers.

Dimoria College celebrates National Science Day with great enthusiasm and zeal on 28<sup>th</sup> February every year. In 2022, an extension activity was conducted in the nearby village of Bhogpur. An awareness camp was organized to demonstrate the importance of bio-fertilizers for soil quality and ecology preservation.

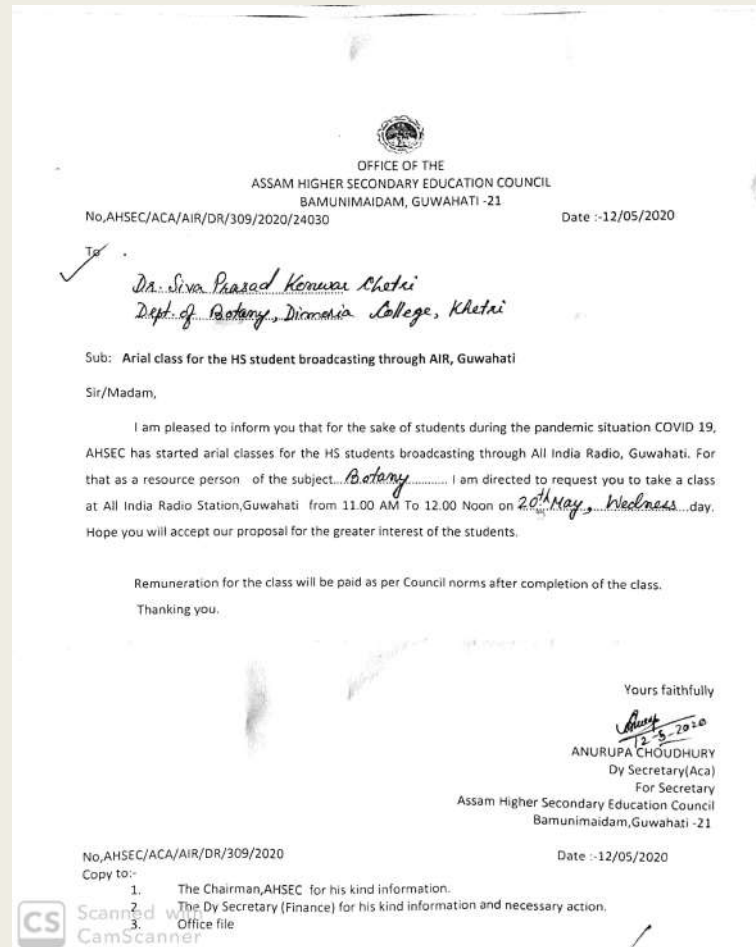

# C. Imparting Online Teaching through the 'DIKSHA' App by Prof. Bhaskar Jyoti Deka, Dept. of Physics.

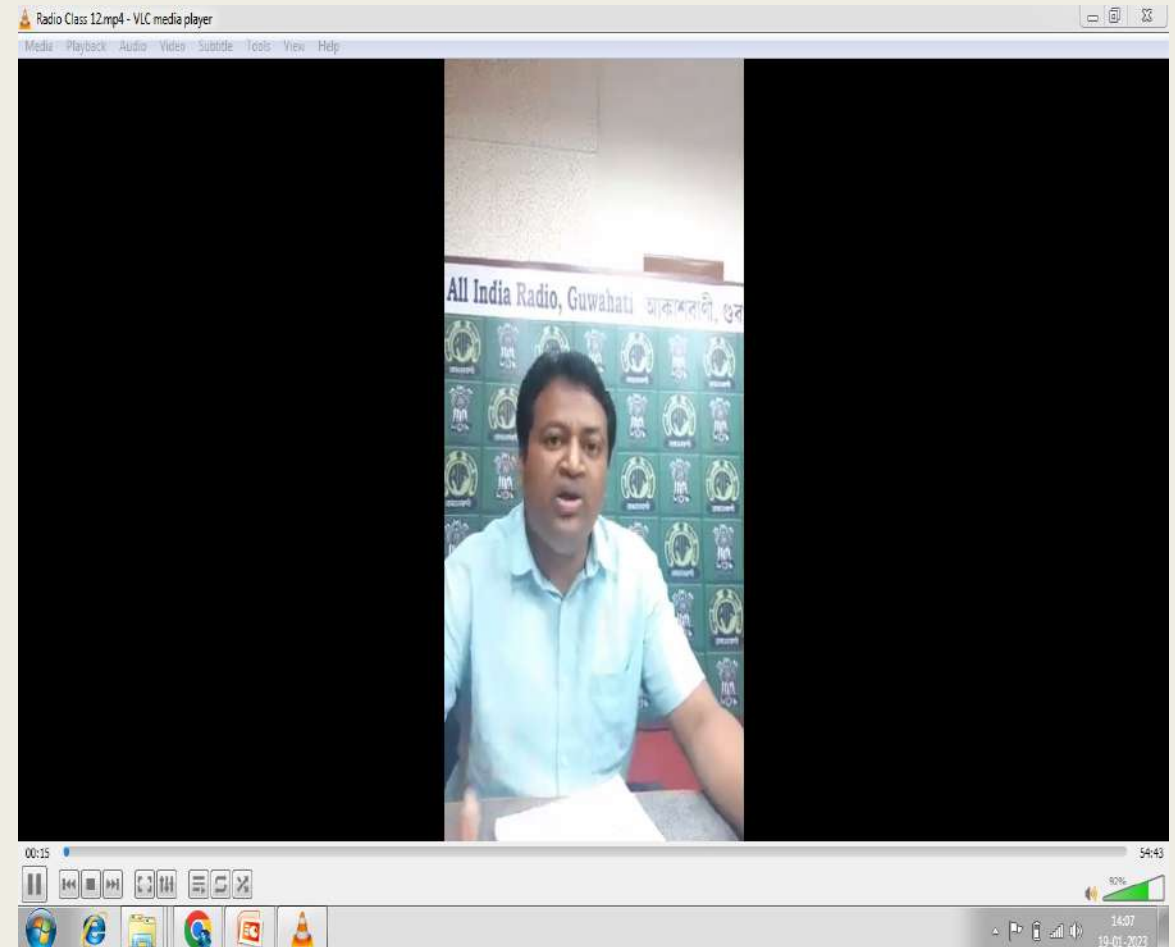

# Aerial Class for students through All India Radio

## Invitation Letter

## Dr. SPK Chetri delivering a lecture

## D. NURTURING LOCAL SCHOOL STUDENTS

The college falls under Dimoria Tribal Belt and Block. The area is predominantly inhabited by tribal people. The nearby schools lack proper infrastructure. In order to help the local school students with their academic upliftment, the college made a humble attempt to help the students academically and has been undertaking various academic programmes in the nearby schools.

To  
The Principal  
Dimoria College  
Khetri, Kamrup (M), Assam

Sir,

It is my pleasure to inform you that the Faculty members of Dimoria College, along with co-ordinator of Biotech Hub, Dimoria College visited our School to take classes on the Subject – Biology of class IX and X during the academic session of 2018 and 2019. The faculty members also discussed various issues of development of scientific temperament among the students.

It is highly beneficial for our students and we expect such classes in coming years too.

St. Agnes English School is grateful for this kind act shown towards us. We appreciate and congratulate the faculty members for carrying out this great task.

Thanking you,

*Sr. Elizabeth*

**HUMANITY WELFARE COUNCIL**  
to serve mankind

Date: 29.12.2021

To,  
The Director,  
Dimoria College,  
Khetri, NEPAL, Assam

On 8 January 2021, The PG Department of Economics, Dimoria College, Khetri invited me for the national seminar on the topic "Help Change India Let's unite for a developed nation". The session was to create and motivate today's youth to set new milestones in which today's every privileged youth should become and contribute to tomorrow's growth. We need to reach towards a country where every individual and community has the importance of giving back what he has taken from society. I also wanted to introduce my organization so that the students of Dimoria College can get a direction on how to work for a change in society.

**Humanity Welfare Council (HWC)** is a national level, non-profit organization in tandem with the government mission to make India a developed nation. Incorporated in New Delhi, India, we came into existence in 2017. We are working diligently towards our mission through our various projects and programs. We aim to make India a developed nation by 2020 under the umbrella of IQAC by taking up the respective causes affecting India's growth. We promote sustainable systems in the form of a developed nation standards achievable without limit.

As we know, the healthcare system in our country is fighting various problems, including the insufficient number of institutions and short-staffed health resources. A few people get treatment, and others are unable to get the primary quality care. Over 60% of our population pays out of pocket for healthcare. About millions die yearly.

**Project Global Care** is a Humanity Welfare Council initiative that aims to transform the health care sector in India by providing necessary funds to people in urgent need of medical assistance and addressing the medical system with financial sustainability. Our motto is to revolutionize our health system and make the medical care available for the general public without any burden of cost. Access to healthcare is a basic human right that every citizen should be able to afford.

We intend to encourage the students to come forward and be a part of this mission by providing them with a platform where whenever they come across any family or person suffering from a financial crisis who also needs immediate medical attention, they can contact them to us. We will take up the case, contact the concerned medical department, track the required amount for the treatment, get the patient treated for free and also take care of the aftercare for a speedy recovery.

In the end of the session you felt that the students were very motivated, we also had an active discussion on what they thought about the concept that we had shared. They were very good listeners and it was also nice to have their response regarding their society in an individual level. I am very much interested to see PG students, Mr. Sarobjit Das and Mr. Dhanu Bhandari towards Economics Dept. of
