

Water Conservation in Dimoria College

1. Rainwater Harvesting: Water conservation in Dimoria College has been given the utmost importance. Necessary arrangements have been made and the system is under construction. The rainwater harvesting system (RWH) in Dimoria College will be ready before the summer monsoon of 2023. A photograph of the under-construction RWH system in Dimoria College is shown below.

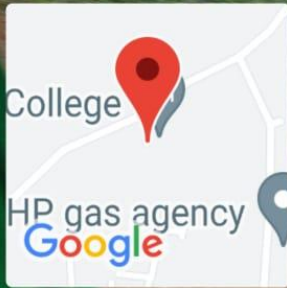

2. Natural water conservation:

Dimoria College maintains a natural water body in its campus. Several species of plants, fish, etc. in the pond make it an ideal example of natural habitat for flora and fauna.
